RILEY CONSTRUCTION LEADING PARK DISTRICT'S LARGEST CONSTRUCTION PROJECT EVER

Kenosha, Wis. – (December 14, 2011) – Riley Construction was selected by the Carol Stream Park District to provide professional construction services for a new \$18 million, 90,850-square-foot community recreation center – the largest construction project in the park district's history.

The two-story facility is planned to become LEED Silver certified and will feature a gymnasium with three basketball courts, fitness and aerobics area, running track, and natatorium. The facility's aquatics center will include an eight-lane, 25-yard competition pool with a diving board at the deep end and a second warming pool with ADA accessible entry for non-competitive swimming programs. It will also house program rooms, locker rooms, a child care center, and administrative offices for the Carol Stream Park District.

Construction began this fall and will continue with the surge of activities in spring 2012. At the height of construction, as many as 150 workers will be on site before construction completion in early 2013 to allow ample staff training time prior to the grand opening scheduled for fall 2013.

About Riley Construction

One of the largest construction management and general construction firms in southeastern Wisconsin and northern Illinois, averaging more than \$110 million in annual volume, Riley Construction is headquartered in Kenosha, Wis., with permanent offices located in Milwaukee and Lake Bluff, Ill. The company provides construction management, preconstruction design/build and general contracting services across a wide range of markets, including health care, municipal, commercial, industrial, public/recreation and education. Projects include new, expansion, renovation and restoration projects for a variety of building types and uses.
