GATEWAY TECHNICAL COLLEGE SELECTS RILEY CONSTRUCTION FOR MULTIPLE CAMPUS IMPROVEMENTS

KENOSHA, Wis. – (April 25, 2010) – Gateway Technical College (Gateway) selected Riley Construction to deliver several significant facility improvement projects at its campuses in Kenosha, Racine and Elkhorn.

Gateway's Elkhorn campus is getting a **new Student Support Center** via a 7,800-square-foot, two-story expansion to its North Building (building 200). The project features a new library, admissions and counseling offices, conference/meeting rooms, general and private study space, and a testing center. The design, led by Partners in Design Architects of Kenosha, also provides space for an outdoor patio for added green space. Riley Construction is providing preconstruction consultation and construction management services.

The project is being designed to LEED-Silver standards and is expected to open in the spring of 2011.

The **Kenosha campus** is renovating its **Surgical and Dental Technology departments** to provide a more modernized learning environment. The Surgical Technology project will include the demolition and renovation of four operating rooms, a preoperation room, classroom space and materials management in support of its vibrant Health Occupations program. Dental Technology will feature six renovated dental exam rooms, a radiology lab with three x-ray rooms, equipment sterilization, materials laboratory and classroom space. Riley Construction will serve as general contractor for the 11,000-square-foot renovation, which is slated to be complete by the start of the fall semester.

Finally, Riley Construction is leading an **air handler and roof replacement** project at the Administrative Building on Gateway's **Racine campus**. The project will provide more energy-efficient HVAC services and will be completed by August.

About the Gateway Technical College

Gateway Technical College collaborates with communities in Kenosha, Racine, and Walworth counties to ensure economic growth and viability by providing education, training, leadership, and technological resources to meet the changing needs of students, employers, and communities.

Gateway offers instructional programs from its campuses and through distance learning opportunities, such as online courses, to approximately 29,000 students annually. Approximately 5,000 full time equivalent students are registered in over 65 career training programs.

About Riley Construction

One of the largest construction management and general construction firms in southeastern Wisconsin, averaging more than \$100 million in annual volume, Riley Construction is headquartered in Kenosha, Wis., with permanent offices located in Milwaukee and Lake Bluff, Ill. As a long supporter of greener and more environmentally-responsible construction, Riley Construction is an active member of the U.S. Green Building Council and Wisconsin Green Building Alliance. Riley Construction provides construction management, preconstruction, design/build and general contracting services across a wide range of markets, including health care, municipal, commercial, industrial, public/recreation and education. Projects include new, expansion, renovation and restoration projects for a variety of building types and uses.
